

Premier Miton Responsible UK Equity Fund

Sterling class B - Accumulation shares

Objective

The objective of the Fund is to provide capital growth over the long-term, being five years or more.

Five years is also the minimum recommended period for holding shares in this Fund. This does not mean that the Fund will achieve the objective over this, or any other, specific time period and there is a risk of loss to the original capital invested.

Risk and reward profile

On 28.07.2025, the Risk and Reward profile changed from 6 to 5. The fund is ranked as 5 because it has experienced medium to high rises and falls in value over the past five years. Please note that even the lowest ranking does not mean a risk-free investment.

Investment overview

- Focused on companies that act responsibly; those with strong environmental or social characteristics (sustainability characteristics), display a good governance profile and that are aligned with responsible investment themes.
- At least 70% of the fund's total assets will meet the responsible investment themes and incorporate sustainability characteristics.
- Responsible investment themes include health and education, protecting the planet and enhancing society.
- Sustainability characteristics assessed include; Green House Gas (GHG) emissions, energy consumption and water usage. Social factors include; labour standards and supply chain management. Governance assessment includes; diversity of management and remuneration standards. These are reviewed alongside financial considerations such as profitability and financial strength.
- Avoids companies that derive 10% of their revenue from tobacco interests, gambling or that are involved in fossil fuels, with other exclusions relating to banned weapons, alcohol, pornography, animal cruelty and human rights. For further information on exclusions please see the responsible investing policy.

Source: FE Analytics. Based on Sterling class B - Accumulation shares, on a total return basis to 27 February 2026. Performance is shown net of fees with income reinvested. Data prior to the launch of the B Accumulation share class is based on B income shares. On 20.01.2020, this fund moved from a single pricing basis (mid) to a swing pricing basis.

The performance information presented on this page relates to the past. Past performance is not a reliable indicator of future returns.

Investing involves risk. The value of an investment can go down as well as up which means that you could get back less than you originally invested when you come to sell your investment. The value of your investment might not keep up with any rise in the cost of living. More information about the risks of investment is provided later in this document.

Charges

Ongoing charges figure (OCF) 1.22%
as at 31.08.2025

The OCF is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). The OCF covers management and other ongoing operational expenses incurred in respect of operating and managing the Fund, but it does not include transaction costs which are associated with buying and selling investments in a fund. All charges can be found in the [Total Costs and Charges Document](#).

Initial charge 0.00%

Charges are taken from income

The fund's charges will be taken from income generated by the fund in the form of interest or dividends. If there is not enough income to cover the charges, the rest of the charges will be taken from the fund's capital which could result in capital erosion or constrain capital growth.

A typical investor in the fund

This fund may be compatible for clients who:

- are seeking the prospect for long-term growth on their original investment
- can invest for the long-term, by which we mean staying invested for at least 5 years
- want to invest in a fund that holds a portfolio of investments that are assessed against ESG criteria
- do not need a capital guarantee
- understand the risks of investing, including the risk that they could lose some of the amount originally invested
- are comfortable with seeing the value of their investment go up and down. There will be times when the value of the fund will fall, especially over the short-term
- understand that there is no guarantee on the amount of investment growth they can expect during the period that they remain invested

This fund may not be compatible for clients who:

- are fully risk averse / have no risk tolerance
- seek capital preservation
- have a short/medium term investment time horizon
- are seeking to receive a regular income
- are looking for a guaranteed level of investment growth
- would be uncomfortable with seeing the value of their investment fluctuating

How the fund might perform

The fund invests principally in the shares of UK companies (known as equities or stocks) listed on the stock market. Therefore, how the UK stock market does overall will impact on the performance of the fund. The fund managers apply an investment strategy that is designed to differentiate the fund from the UK stock market. Therefore, the performance of the fund will differ from the performance of the UK stock market over different time periods.

A number of different factors influence the share price of a company. Companies tend to do better when economic growth is stronger and worse when it is weaker. Many companies can also do better when inflation and interest rates are low or falling and worse when they are high or rising, although other companies may benefit in those conditions. Factors

specific to individual companies, such as demand for their products or services, are also important. Investments with strong Environmental, Social and Governance (ESG) characteristics can be affected by related factors, such as climate change, which may be positive or negative at different times.

The fund managers will invest in large, medium and smaller sized companies and these can perform differently too. For example, large UK companies often have more of their business outside the UK, so a strong global economy would be beneficial. Smaller UK companies are typically more focused on the UK, meaning business conditions domestically will be important to how they do. The fund managers can choose companies from a range of industry sectors such as healthcare, engineering

and information technology to diversify risk, and these sectors will perform differently depending on how that particular industry is doing.

However, most importantly, the fund managers focus on the management teams and business attributes of each individual company with the aim of building a portfolio of high quality companies that they expect will thrive in different economic and financial market conditions.

You should not expect the fund to perform like a UK stock market index, such as the FTSE All-Share Index, as the fund invests in a range of specially selected companies. There is no guarantee as to how financial markets will perform in the future or how the fund will perform.

Performance comparator

The fund is classified in the IA UK All Companies sector, which we believe is a meaningful comparator to help investors

assess the performance of the fund.

General risks Investing involves risk. The value of an investment can go down as well as up which means that you could get back less than you originally invested when you come to sell your investment. The value of your investment might not keep up with any rise in the cost of living.

Typically, there is less risk of losing money over the long-term (which we define as over 5 years) from an investment that is considered low risk, although potential returns may also be lower. Investments considered higher risk typically offer greater opportunities for better long-term

returns, though the risk of losing money is also likely to be higher. Premier Miton is unable to provide investment, tax or financial planning advice. We recommend that you discuss any investment decisions with a financial adviser.

Specific fund risks Some of the main specific risks of investing in this fund are summarised here. Further detail is available in the prospectus for the fund.

Equities
Equities (company shares) can experience high levels of price fluctuation. Smaller company shares can be riskier than the largest companies, companies in less developed countries (emerging markets) can be riskier than those in developed countries and funds focused on a particular country or region can be riskier than funds that are more geographically diverse. These risks can result in bigger movements in the value of the fund. Equities can be affected by changes in central bank interest rates and by inflation.

High volatility
This fund may experience high volatility due to the composition of the portfolio or the portfolio management techniques used.

Other investment risks
Funds may have holdings in investments such as commodities (raw materials), infrastructure and property as well as other areas such as specialist lending and renewable energy. These investments will be indirect, which means accessing these assets by investing in companies, other funds or similar investment vehicles. These investments can also increase risk and experience sharp price movements. Funds focused on specific sectors or industries, such as property or infrastructure, may carry a higher level of risk and can experience bigger movements in value. Certain investments can be impacted by decisions made by third parties, such as governments or regulators.

Other risks
There are many other factors that can influence the value of a fund. These include currency movements, changes in the law, regulations or tax, operational systems or third-party failures, or financial market conditions that make it difficult to buy or sell investments for the fund.

Sustainable company concentration
Funds that follow a responsible or sustainable investment approach exclude investments which do not meet certain Environmental, Social, Governance (ESG) or sustainability criteria. This means they may be higher risk than more diversified funds.

Other information The Global Industry Classification Standard ("GICS") was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by Premier Asset Management Limited. Neither MSCI, S&P nor any third party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability and fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

A swing pricing is where the price can swing to either a bid or an offer basis depending on the investment and redemption activity in the fund. This means the investor selling or buying fund shares bears the associated [dis] investment costs and protects the continuing holders in the fund. Performance could be shown on a combination of bid, mid or offer prices, depending on the period of reporting.

FCA Sustainability Disclosure Requirements
The Financial Conduct Authority ("FCA") requires UK based funds with a sustainability objective to have a UK sustainable investment label. Sustainable investment labels help investors find products that have specific sustainability goals. This fund does not have a specific sustainability objective so does not qualify for a sustainable investment label, although the fund does make investments that are assessed against sustainability characteristics.

Glossary

Annual management charge (AMC)

The yearly fee paid to Premier Miton for managing a fund, expressed as a percentage of your investment. The AMC does not typically change from year to year.

Capital

Describes financial assets, particularly cash, or other assets, such as shares, owned by a person or organisation.

Capital growth

The increase in the value of an asset or investment over time, excluding any income received, measured by its current value compared to its purchase cost.

ESG Factors

Environmental, social and governance (ESG) factors are identified and assessed in responsible investment processes. Environmental factors relate to the quality and functioning of the natural environment and natural systems including climate change. Social factors relate to the rights, well-being and interests of people and communities including internal stakeholders (including working conditions and labour standards) as well as external (product safety and sourcing). Governance factors relate to the board structure and oversight of a company.

Equities

Another name for shares (or stock) in a company.

Investment Association (IA)

The trade association that represents investment management firms in the UK.

Investment Association (IA) sectors

To help with comparisons between the thousands of funds available, funds are categorised into different groups or sectors, organised and reviewed by the Investment Association (IA).

IA UK All Companies sector

Funds in this sector are required to invest at least 80% of their assets in UK equities which have a primary objective of achieving capital growth.

Individual Savings Account (ISA)

A wrapper in which eligible UK residents can place their savings and investments to protect them from some forms of taxation. There are different types of ISA. HM Revenue & Customs set the amount that you are allowed to invest into in an ISA in each tax year, which can be found on the Government website.

Ongoing Charges Figure (OCF)

A measure of what it costs to invest in a fund over a year. It includes the fee paid to Premier Miton for the management of the fund (known as the annual management charge) and the OCFs of underlying funds that might be held in a portfolio (excluding any Premier Miton funds held) with the remainder covering costs that have to be paid to external companies for other services relating to the ongoing administration and management of a fund, such as the fees paid to the depositary, custodian, regulator, auditor and administrator. The fee is deducted from the value of the fund and reflected in the fund's share price. The OCF is typically calculated once a year and can change from year to year. The OCF does not include transaction costs which are associated with buying and selling investments in a fund.

Total return

A way of showing how an investment has performed and is made-up of the capital appreciation or depreciation and includes any income generated by the investment. Measured over a set period, it is expressed as a percentage of the value of the investment at the start of that period.

Customer care

Investors may find themselves in difficult circumstances at any point in their lives, whether as a result of a change in physical or mental ill-health, or during key life stage events such as bereavement, loss of job, personal debt concerns, or more generally through lack of confidence in dealing with financial matters.

We encourage all our investors to seek financial advice before making any important investment decisions and particularly when life may be more challenging. We want to make sure that we can provide our customers with the support they need. If you would like copies of product information in a

different format, such as **large print**, **Braille** or **audio**, please send us your request using the contact details provided. It may take up to 15 working days to send the information to you in these formats.

Important Information

This is a marketing communication

Investors should refer to the Prospectus and to the Key Investor Information Document (KIID) before making any final investment decisions. A free, English language copy of the Prospectus, KIID and Supplementary Information Document are available on the Premier Miton website, or copies can be requested by calling 0333 456 4560 or emailing contactus@premiermiton.com.

Whilst every effort has been made to ensure the accuracy of the information provided, we regret that we cannot accept responsibility for any omissions or errors. Premier Miton is unable to provide investment, tax or financial planning advice. We recommend that you discuss any investment decisions with a financial adviser. Reference to any investment should not be considered advice or an investment recommendation.
